Education

University of Waterloo Waterloo, ON

Bachelor of Applied Science in Computer Engineering *Sept. 2021 – May 2026*

- Recipient of Richard & Elizabeth Madter Entrance Scholarship and President's Scholarship of Distinction
- **Relevant Courses**: Signals & Systems, Digital Computers(ARM), Instrument & Prototyping Lab, Embedded Microprocessing Systems

Experience

Digital IP Verification Intern May 2023 – Sep. 2023

NXP Semiconductors Canada *Kanata, ON*

- **UVM SystemVerilog**: Designed testbench stimulus environment for an IP Block in Dataplane processing.
- **Test Planning**: Created Simulation scenarios for testing IP block features and edgecases.
- **Simulation**: Worked on Simulation Environment programming to reach total functional coverage.

Software Engineering Intern Sept. 2022 – Dec. 2022

Synapse Product Development *Seattle, WA*

- **Prototyping**: Leveraged Zephyr RTOS to create a proof of concept on *NRF52 BLE* device.
- **Python APIs**: Developed company specific lab automation software for equipment from *Agilent, Keysight, NI, Tektronik.*
- **Automation**: Streamlined testing and in house procedures using *Python* and *Bash.*
- **Driver Development**:Designed and implemented *drivers* for the controls of PCB testing Device*(I2C, UART)*

Firmware developer Jan. 2022 – April 2022

Ford Motor Company of Canada *Remote*

- **Unity/Cmock Test framework**: Lead developer for optimization for unit testing, achieving up to *30% faster* runtime while using *50%* less manually written test cases.
- **Automation**: Improved *Jenkins CI/CD* pipelines to support unit testing automatino using *Python* for Linux server.
- **Embedded Trace Debugging**: Tested logging and interrupt algorithms and debugged on hardware test benches through CAN and Serial.
- **Automotive Design**: Maintained *AUTOSAR* standard design with *ISO26262 safety design* using *Davinci Configurator.*

Firmware Team Member Sept. 2021 – Present

UW Midnight Sun Solar Rayce Car Team *Waterloo, ON*

- **functional Macro**: Helped in abstracting RTOS functionalities through macros for ease of use in embedded programming.
- **Testing**: Programmed smoketesting firmware in C for *STM32* processors in Linux virtual machine using Vagrant Virtual Box.
- **CAN API autogeneration**: Implemented C file autogeneration using input yaml files through Python and Jinja2.

Projects

LC VM: A C functional approach to implement an educational ISA. Improves on online design using Python data logging.

Morse Code Time Machine: A multi-player STM32 hardware puzzle project created for escape Room environment

Cube Solver: A Program that can solve any Rubix Cube you scramble. Optimized for bitwise operations

Technical Skills

Languages: Python, C/C++, Tcl, Bash scripting, ASM, VHDL, SystemVerilog/Verilog,
Tools: Quartus, Git, Linux, Qemu, GNU Tools, Docker, WireShark, UVM, Matlab
Hardware: Oscilloscopes, Logic Analyzer, Multimeters
Protocols:TCP/IP, JTAG, Serial, Ethernet, CAN/CAN-FD, LIN
